# Statistics

49%

of people without access are in the lowest socio-economic groups

39% of

of the population in the UK *without* access to the internet

80%

of government interactions with the public take place with the bottom 25% of society, so failing to encourage everyone online keeps government costs high

# Blurring of boundaries?

From Wikipedia, the free encyclopedia

It has been suggested that this article or section be **merged** into **Computer literacy**. (**Discuss**)

**Digital literacy** is the ability to locate, organize, understand, evaluate, and create information using digital technology. It involves a working knowledge of current high-technology, and an understanding of how it can be used. Digitally literate people can communicate and work more efficiently, especially with those who possess the same knowledge and skills. Certifications are available to determine if a person is digitally literate.

Digital literacy encompasses computer hardware, software (particularly those used most frequently by businesses), the Internet, cell phones, PDAs, and other digital devices.

# Digital Britain Report

In looking at Digital Britain, there is a sense of confusion that many of the initiatives that feature in our Media Literacy and Digital Literacy

There are clearly several essential dimensions that we need to understand their importance as an essential part of our lives.

Without such skills citizens run the risk of being excluded and disenfranchised from day to day life. Being able to gain access to digital material is only the beginning and a combination of all the literacies is required.
